

## Living Things: Plants

Last week you did a nature walk to find some nice plants. To finish off that task, we would like you to create a fact file about one tree or plant.

You can pick a plant that you found on your walk or perhaps one of your favourite flowers!

You need to draw a picture of it and then create a fact file about it. Don't forget to include how long they live for, what they look like at different times of the year and any interesting facts about them! (It could be a symbol of a country or used in a film!)
