

Mini Mash Home Learning Tasks wb 8.6.20

Go to 'Maths City,' it is the yellow picture on the wall. Click on the slide picture next to the pond. Then build your own play area. Make your own playground by dragging the objects into the picture. Don't forget to put the ducks, goose and swan in the water! Have fun designing your own play area! With a little adult help you can even drag the correct letter sound in to label some of the objects (eg d for duck, b for boy etc).

Click on the children at the table playing a game. There are many lovely pairs games to play. In the pairs games with 8 cards try the number matching game (its called 'Numbers'). See how many numbers you can match.

Go outdoors in mini mash, can you see the little girl playing music? Explore patterns of sounds using the different instruments (in 2Explore). You can save these for us to hear when we check your tray. Then try making your own music in 2Beat. Good luck!

Try a wet paint picture! This is outdoors on mini mash, click on the children painting and select '2Paint a picture,' then 'Wetpaint.' Have fun when the paint drips! Remember to save your wet pictures in your tray for us to see.
